

# SC3 EZ 2002-02-17 09:13:20-10:13:55 With Gaussian Fit

Gaussian Fit Coefficients (Even Weighting):

$$f(X) = A_0 \cdot \exp(-Z^2/2)$$

$$\text{Where } Z = (X - A_1) / A_2$$

$$A_0 = 0.0824347 \quad \text{Sigma} = 0.419188$$

$$A_1 = -0.00460857 \quad \text{Sigma} = 2.59898$$

$$A_2 = 0.442407 \quad \text{Sigma} = 2.59775$$

$$\text{Chi-squared} = 7.29613e-06$$
